

## Life in Nagasaki

It is a happy time for me to study in Nagasaki University Hospital. Since I have been here for about eight months, I found this place is a good and beautiful place to live in. Because there are friendly and politely people, nice and fresh air, blue sky, warmly sunshine and good temperature and weather, as well as many delicious foods and drinks. When it comes to drinks, I found that almost everybody in Japan can and love to drink some beer or wine. Maybe drinking is a good way to relax our body and reduce the pressure. And it's true that if you want to get well knowledge of a Japanese person, the appropriate way is to drink with them.

Study in the department under Prof. Eguchi provides me many excellent experiences. All the members of the department accepted me very kindly and warmly. They offered me many kinds of helps in my daily lifetime as well as learning time in the hospital. Prof. Eguchi and Dr. Toshiyuki took me to have a taste of Chinese food in Nagasaki many times; Dr. Hidaka picked me up at the Matsuyama station at the first day I came to Nagasaki, and helped me to buy some daily necessities; Dr. Koike and Dr. Yushikawa helped me apply for the materials of doctor course; Dr. Sakai taught me a lot of experiment technologies. Dr. Takatsuki, Hidaka, Soyama and Hamada helped me check the presentation slides; Dr. Inoue and Sakimura taught me oral Japanese; and many other staffs introduced me the famous food and drinks and sightseeing spots in Nagasaki. It's difficult to list all those kindly things. But all small kindly, I will remember in my heart.

The staffs in the department are just like the membership of a big cozy and harmonious family, it is honored for me to join in such a lovely family. Those good place and friendly environment motivated me to positive attitude, aimed me in the right direction and broadened my horizons. I will try my best to get a big achievement in my future four years in Nagasaki.
